

UMIT AHMET

Front-End Developer

+905527273780 @ umitahmet10@gmail.com umitahmet.com Bursa,Turkey

SUMMARY

Proactive Front-End Developer with experience in developing high-performance web applications in the Next.js, React, and Vue.js ecosystems. Achieved up to 30% speed increase and 15% organic traffic growth in projects through SEO and performance optimization. Successfully worked on multiple international projects, using modern JavaScript technologies to produce user-focused and scalable solutions. Strong at pixel-perfect design implementation, quickly resolving technical issues, and effective communication within a team.

EXPERIENCE

Front-End Developer, Remote

Epigra.com 12/2024 - 07/2025 Istanbul, Turkey

- Enhanced task management application using React.js, implementing improvements and resolving design inconsistencies.
- Contributed to 8+ Statamic CMS projects, ensuring seamless functionality across diverse client requirements.
- Delivered pixel-perfect front-end implementations, translating designs into responsive interfaces.
- Collaborated effectively within cross-functional teams of 15-20 members, maintaining consistent project delivery and adhering to Agile development practices.

Front-End Developer, Remote

Promesolutions.com 12/2023 - 11/2024 Podgorica, Montenegro

- Independently developed 10+ corporate websites using Astro.js and React, delivering functional business solutions.
- Converted Figma designs into responsive, pixel-perfect web interfaces across all devices.
- Achieved PageSpeed scores of 90-100 through optimization and modern development techniques.
- Implemented projects using modern technology stack including TypeScript, Tailwind CSS, React, Astro.js, and Alpine.js, maintaining clean and maintainable codebases.

Front-End Developer (Project Based), Remote

Biletcenter.com 11/2023 - 04/2024 Istanbul, Turkey

- Collaborated with 4-member team to develop ticket management dashboard for online purchasing system.
- Built responsive interface using React.js and TypeScript for intuitive user experience.
- Applied responsive design with Tailwind CSS and SCSS across desktop and mobile devices.

Front-End Developer Intern, Remote

Drag and Publish 06/2023 - 12/2023 Istanbul, Turkey

- Contributed to the development of a drag-and-drop website builder in a startup environment under the guidance of a senior developer.
- Applied software architecture principles including component-based design and state management.
- Built reusable UI components, improving code efficiency and maintainability.
